### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

#### DETAILED ACTION

1. The rejection under 35 U.S.C. 102(b) using Thomas et al. is withdrawn in view of applicant's amendment of claim 1.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thomas et al. U.S. 4,535,020 in view of Lee et al. (U.S. 6,228,462) further in view of Hammons et al. (U.S. 5,647,863).

Thomas shows an elliptical cross section in a film used as a top sheet for diapers (Figure 3, col. 1, lines 10-20). Lee shows a "U" shaped cross section with the x axis portion being smaller than the y axis portion in order to provide a large hole size while still having adequate standoff to prevent liquid strike back (Figure 3, elements 81 and 83, col. 6, lines 40-55). Hammons et al. teaches that a 25% open area of an apertured

Art Unit: 1772

formed topsheet is optimum to allow good liquid flow to the absorbent layer (col. 6, lines 5-20). The instant invention claims an elliptical cross section formed by the walls of adjacent capillaries with the x axis bottom being of a lesser dimension than the y axis height and an open area percent of 20 to 33%. It would have been obvious to one of ordinary skill in the art to have made the y axis of the elliptical cross section of Thomas larger than the x axis in order to have an adequate standoff while still having an adequate sized top opening area because of the teachings of Lee et al. It further would have been obvious to have an open area of 25% to allow good liquid penetration of the topsheet of Thomas in view of Lee because of the teachings of Hammons et al.

4. Applicant's arguments with respect to claim 1 in the paper filed 20 December 2004 has been considered but are moot in view of the new grounds of rejection.

The modified rejection given above addresses the new open percent limitation.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS**

Art Unit: 1772

**ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. The examiner will consider rejoinder of the article and apparatus claims if there is unity of invention between the two groups at the time of a finding of allowability of the article claims.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William P. Watkins III whose telephone number is 571-272-1503. The examiner works an increased flex time schedule, but can normally
